

# engin VoIP

## Since 2004 engin has been offering a VoIP Phone Service directly to residential and small business customers.

engin provided the first VoIP Phone Service broadly available to Australian consumers, directly and through major retailers. engin is an Australian based company and our call centre and operations are based in Sydney.

Taking advantage of your existing broadband connection, you can make and receive calls over the Internet whilst using an ordinary handset. Our easy-to-use service drastically reduces phone bills and offers a range of free included features such as Voicemail, Caller ID, Call waiting and more.

engin connects directly to your broadband connection. Your computer doesn't need to be switched on to make a call. As long as your broadband connection is operating you will be able to call with engin. All you need is a VoIP compatible device or buy an engin Voice Box, plug in your existing phone, then connect the engin Voice Box to your broadband modem/router.
